Equipment Checklist

- ✓ Spare Saltwater Mixed up?
 - ✓ clearly marked "saltwater"?
 - ✓ Do you have enough salt to make even more saltwater (at least enough to make 35% of your tank's volume)
- ✓ Spare RO/DI water on hand?
- ✓ RO/DI unit ready to go?
 - ✓ Filters fresh and not near end of life?
- ✓ Spare aquarium or coolers on-hand?
 - ✓ Clean?
 - ✓ Thermometer available for holding containers?
 - ✓ Spare heater?
 - ✓ Extra rock for places for fish to hide?
 - ✓ (Large PVC elbows and pipe if rock isn't available)?
 - ✓ Air pump and bubbler?
- ✓ Battery backup charged and wired in?
 - ✓ Generator gassed up and functioning?
- ✓ Controller accessible and configured to email/text alerts?
 - ✓ Controller plugs labeled? (see page 1)
- ✓ On-call tank buddy know they could be called?
 - ✓ On-call tank buddy's number in your phone as well as written down on paper?
- ✓ Sufficient cash or credit available for new equipment?
- ✓ Spare powerhead(s)?
- ✓ CoralRx coral dip for when corals return to your tank?
- ✓ Fish nets accessible, clean and free of tears?
- ✓ Fragging tools ready to go? (in case colonies can't be saved)
 - ✓ bone cutters
 - ✓ tweezers
 - ✓ super glue
 - ✓ frag plugs
 - ✓ safety goggles (for soft corals)
 - ✓ tupperware to hold frags
- ✓ Refractometer calibrated and on hand?
- ✓ Flashlight with spare batteries?
- ✓ Spare towels?
- ✓ Test kits (Ammonia/Nitrite/Nitrate/Alkalinity) on hand?

*Note: If you live in a remote area, or do not have a local fish store within 1 hour driving distance of your house, I recommend you keep extra salt, holding containers, heaters, air bubblers and pumps on hand.
